Professional Summary

Impact focused software engineer with 7+ years of experience delivering projects like “Scalable Data Plane”, “Context Based Quotas” and “Region Build Automation” using scalable technologies like NoSQL, Serverless and Monitoring, Bedrock, AI Agents and RAG. Currently Focused on leveraging and building Gen AI solutions to improve Cloud Operations within the Service Quotas platform.

Experience

Software Development Engineer II - Amazon Web Services

June 2022 - Present

- Reduced onboarding time to Service Quotas for Service Teams 80% by building a Scalable Dataplane using DynamoDB as a backend data store. The solution considers scalability and latency and exemplifies AWS best practices.
- Spearheaded the end-to-end delivery of an asynchronous API's for automated quota utilization reporting, achieving high-performance analysis (<2s) for 99% of accounts.
- **Architected** the team's first AI agents using Amazon Bedrock and RAG (Retrieval-Augmented Generation); established a high-precision **Knowledge Base system achieving 80%** accuracy in automated responses by using Bedrock's API's. Built agents using the supervisor/subagents model using kiro
- Implemented AWS's Hire and Develop The Best leadership principal and mentored 3 successful interns for 100% return offer.
- Built the team's inaugural Model Context Protocol (MCP) server, to streamline log analysis using AWS CloudWatch, which resulted in an 25% reduction in ops pain.

Software Development Engineer I - Amazon Web Services

March 2020 - June 2022

- Developed API's robust quota automation framework, using AWS Lambda and AWS SNS which resulted in automated quota approval based on rules defined by service teams resulting in 30% reduction in AWS Support Cases.
- Identified and Enforced AWS best practices for deployment safety in CI/CD pipelines as a Change management Bar Raiser resulting in 15% fewer rollbacks in deployments.
- Identified and fixed a bug in a legacy component causing notifications to be sent to the incorrect team, thus reducing operations pain by 20%.

Application Development Analyst - Accenture Solution

May 2016 - June 2018

- Integrated a novel solution, which allowed key stakeholders to view analytical metrics on web-pages using vanilla Css and JavaScript allowing ease of access in mobile and tablet devices.
- Developed and modeled a dashboard, which allowed key stakeholders to view and act on key metrics.

Education

Stony Brook University, Master of Science in Computer Engineering
Kumaraguru College of Technology, Bachelor of Engineering in EEE

August 2018 - December 2020
June 2012 - April 2016

Skills

Java, Ruby, Python, Software Development, DynamoDB, Lambda, Serverless, MCP, QlikView, Qlik Sense.
